Strategic Squadron Ops Update

The logo for the Strategic Squadron Ops Update, featuring a light blue shield with a white star in the center, surrounded by a yellow border. The words "STRATEGIC SQUADRON OPS UPDATE" are written in blue across the shield. Below the shield, the words "AIR FORCE SPACE COMMAND" are written in a curved, light blue font.

**Colonel Paul
Cardon**

I n t e g r i t y - S e r v i c e - E x c e l l e n c e

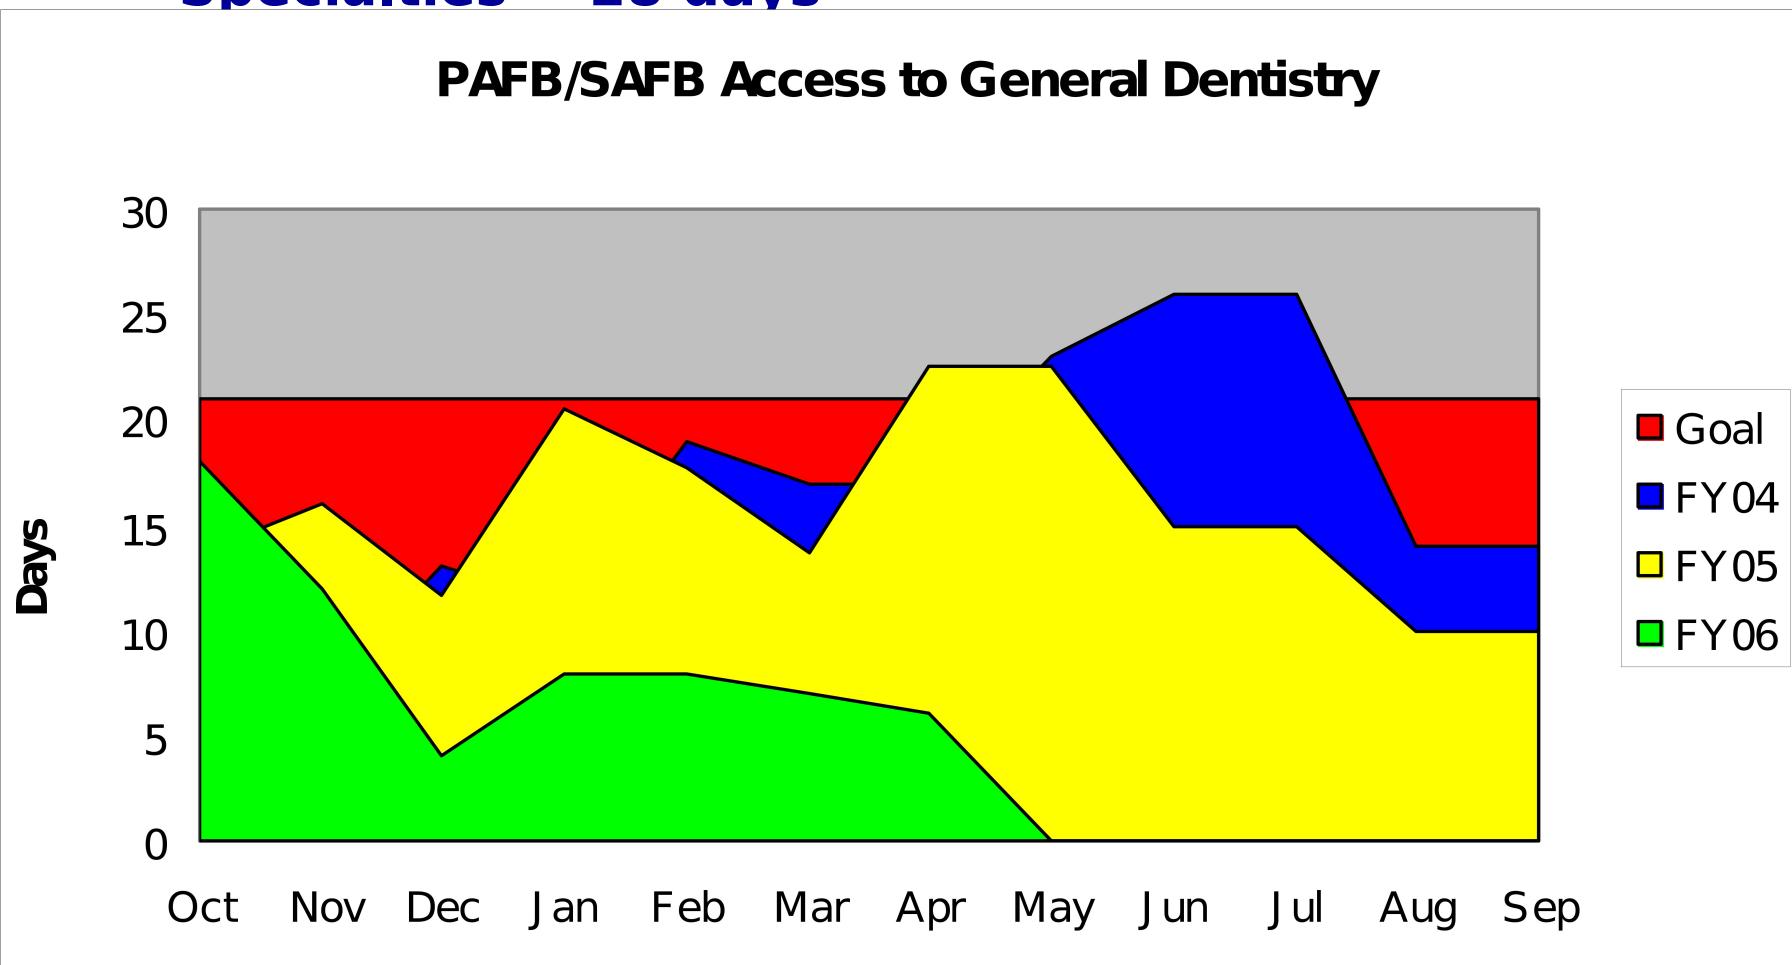

Dental Sq Ops Update

21 MDG

- AF Standards for Access to Dental Care
 - General Dentistry = 21 days
 - Specialties = 28 days

PAFB/SAFB Access to General Dentistry

Dental Sq Ops Update

22d MDG

- **Electronic Dental Patient Satisfaction Surveys**
 - Not same as Service Delivery Assessment (by phone)
 - Must have @____.mil email address saved by clinic
 - Email survey sent to patients after clinic visit
 - Results of survey answers reported quarterly
 - Satisfaction with clinic/care
 - Appt wait time
 - Helpfulness of front desk, etc.
 - Comments available daily for review by clinic staff

Dental Sq Ops Update

21 MDG

- Confusion with email appointment reminders
 - Driven by web-based scheduling software application
 - All 21 DS patients viewed as *belonging to PAFB*
 - Messages to scheduled SAFB, CMAFS patients remind of appointments 'at PAFB Clinic'
 - Unable to modify message based on unit of assignment
 - Feature being turned off for SAFB/CMAFS patients
 - Affects electronic Patient Satisfaction Survey access

Aerospace Medicine quadron Ops Update

A circular logo for the Aerospace Medicine quadron Ops Update. It features a central white star with a globe and a path around it, set against a light blue background. The words "AEROSPACE MEDICINE" are at the top and "quadron Ops Update" are at the bottom, both in blue. The entire logo is enclosed in a yellow border with the words "AIR FORCE SPACE COMMAND" written along the bottom edge.

**Lt Col Charles
“Tuna” Carlton**

Integrity - Service - Excellence

Aerospace Medicine SQ Ops update

22 MDG

- Recent Mump Outbreak and what it means to us in CO
- HAWC Update
- Deployment Issues / PDHRA update
- PIMR Update
- Flt Med

Mumps Epidemiology

21 MDG

- Iowa experienced a large Mumps outbreak that began in Dec 05
 - Majority of cases occurred in ages 18-25
- **Additional cases in IL, IN, KS, MI, MN, MO, NE, and WI**
- **No Confirmed cases in Colorado as of 25 Apr 06**
- **Most states currently require 2 doses of Mumps vaccine for school-age children (usually combo vaccine-MMR)**
 - 1 dose gives 80% immunity; 2 doses gives >90%
- **Immunity is normally considered as:**
 - Born before 1957, or 1 dose of vaccine, or positive mumps titer
- **During outbreaks:**
 - **2 doses recommended for “At-Risk” groups:**
 - Individuals never vaccinated or never having mumps
 - Health Care workers (esp ER and Primary Care)
 - School-age children & students of post-high school educational institutions
 - Pregnant individuals will get a lab titer instead of vaccine
 - **Exception: only 1 dose if born before 1957**

Mumps 101

21MDG

- **Mumps is a vaccine-preventable viral infection**
 - **Non-specific symptoms: fatigue, fever, headache, decreased appetite**
 - **Many patients develop tender swelling of salivary glands**
 - **Complicated cases can have painful swelling of many glands: salivary, testicles, ovaries, breasts, brain, and spinal cord**
 - **Transmission: Direct contact with respiratory droplets, saliva, or contact with freshly contaminated surfaces.**
 - **Incubation period: 16-18 days**
 - **Individuals are contagious 2-7 days prior and 9 days after onset of symptoms.**
 - **Individual treatment is aimed at controlling symptoms**

Current 21 MDG/AFSPC Plan

21 MDG

- AFSPC identified 52 AD personnel from PAFB, SAFB, and CMAFS with unknown Mumps status
 - Contact units to get these individuals vaccinated
- Contact the AFCITA programmer to create a custom listing of mumps status with numbers of vaccines:
 - If evidence of spread to CO we may vaccinate "At-Risk" groups
 - 2 doses would be confirmed and/or administered for:
 - Health Care Workers first
 - Troops in the dormitories second
 - Documented history of Mumps disease or Mumps immunity (lab test/titer) will be accepted in place of the 2 dose requirement
 - Only 1 dose if born before 1957
 - Pregnant individuals will get a lab titer instead of vaccine
- Predict vaccine supply needs before and as the demand/situation changes
- Base paper article submitted and providers notified
- Positive mumps cases will be excluded from school/work (isolation) while contagious--Dorm residents should remain in their room

Aerospace Medicine Sq Ops Update

21MDG

- **19 May - HAWC/SVS are sponsoring Health/Fitness Fair**
 - Location: Base Fitness Center
 - For more information call 556-1515

- **24 May - HAWC/SVS are sponsoring a Retiree Lunch/Learn Workshop**
 - Healthily Living will be discussed
 - Location Base Fitness Center
 - For more information/Reservations call 556-1515

Aerospace Medicine Sq Ops Update

21 MDG

■ Post Deployment Issues

- New DoD Post Deployment Reassessment (PDHRA) requirement
 - UDM will contact troops 90 days post-return to complete the DD2900 (PDHRA) online between 90-180 days.
 - PRP personnel have to complete the PDHRA in the MTF
 - MDG PDHRA monitors will monitor/review/track DD2900's via PIMR on daily basis

■ PIMR 21 SW currently at 86%

- Monthly UHM meeting - mandatory for all SQDNs
- QNFT will be incorporated in wing PIMR requirements

■ Flight Medicine Clinic - “Right Sizing” Empanelment

- DEC 2005 AF/SG memo clarifying empanelment rules for Flt Med.
- Determined by Flyers, Special Operational, and Dependents IAW 48-101
- 21 MDG is currently working plan to meet AF SG requirements and will
 - Meet with affected units to ensure seamless transition
